

Notes for Indian Group Instruction

Synferlo

August 29, 2020

1 Layout Formatting

1.1 Indentation

Example with indentation:

You might have noticed that even though the length of the lines of text we type in a paragraph are different, in the output, all lines are of equal length, aligned perfectly on the right and left. TEX does this by adjusting the space between the words.

Example without indentation:

You might have noticed that even though the length of the lines of text we type in a paragraph are different, in the output, all lines are of equal length, aligned perfectly on the right and left. TEX does this by adjusting the space between the words.

1.2 Quotes

1.3 Dash lines

X-ray are discussed in pages 221–255 of Volume 3—the volume on electromagnetic waves.

1.4 Backlash

Use `\textbackslash` to produce `\`.

1.5 Special symbols

90 % of the people

#

\$30

-

&

{ }

~

^

1.6 Line-Distance

This is the first line.

This is the second line.

This is the thrid line without setting distance.

1.7 Text Positioning

Clemson University

Certificate

This is to certify that Synferlo has finish this program.
